

Mohammad Askari

Front-end Developer

Enthusiastic and ambitious Front-end Developer with **three years** of experience, specializing in building **user-friendly React applications** using the state-of-the-art technologies. Hands-on experience in developing web applications in **React JS, TypeScript, Tailwind, JS (ES6), HTML, CSS**. And using **Next.js** for **SSR** and **SSG** projects, I have experience bringing **Figma** designs to life using **Reusable components**. Eager to learn and adapt, I am passionate about front-end technologies and committed to driving excellence in a growth-oriented team.

WORK EXPERIENCE

Front-end Developer Chargoon

06/2022 - 09/2023

Tehran/Iran

Chargoon is the largest provider of **web-based human resource solutions** in Iran.

Achievements/Tasks

- Collaborated closely with **designers, infrastructure team** and **backend developers** to implement features **quickly** and **reliably**.
- Extensive experience using **re-usable components** provided by the infrastructure team.
- Integrated **RESTful APIs** and **state management** solutions using **Redux** and **Context API** improved application performance and maintainability.
- Participated in the **agile** development process, contributing to **sprint** planning, **daily standups**, and **retrospectives** to align development with project goals.
- Worked on implementing a high priority **employee assessment module** containing complex **workflows**, with a team of 5.
- Implemented a **drag and drop** module for messages and documents in the workflow which was not supported by the infrastructural components.
- Achieved a **20% increase** in completed **story points**, boosting team productivity and delivering projects on time.
- Conducted thorough **code reviews**, identified issues, and provided constructive **feedback**, leading to improved code **quality** and **consistency**.

Front-end Developer Lipak

07/2020 - 06/2022

Tehran/Iran

Lipak is a leading **e-commerce platform** specializing in selling electronic products.

Achievements/Tasks

- Collaborated with a team of three front end developers to deliver **features** and **debug** ongoing issues.
- Implementing secure user **authentication** and **role-based access control** to manage employee and managerial privileges on different portals.
- Built an internal **chat system** using **websockets** API to facilitate seamless communication between employees resulting in **30% reduction in email usage** and **faster issue resolution**.
- Was solely responsible for development of a **logistics platform** exposing cumulative sale of items and stock levels along with PDF reports.
